TECHNICAL REPORT DATA

(Please read Instructions on the reverse before completing)

1. REPORT NO.	2.	3. RECIPIENT'S ACCESSION NO. PB84 207562
4. TITLE AND SUBTITLE EPA Environmental Data Base and Model Directory Volume 1		5. REPORT DATE July 1983 6. PERFORMING ORGANIZATION CODE
7. AUTHOR(S)		8. PERFORMING ORGANIZATION REPORT NO.
9. PERFORMING ORGANIZATION NAME AND ADDRESS Same as box 12		10. PROGRAM ELEMENT NO. 11. CONTRACT/GRANT NO.
12. SPONSORING AGENCY NAME AND ADDRESS EPA Information Clearinghouse (PM-211A) Library Systems and Information Office U.S. Environmental Protection Agency 401 M St., S.W. Washington, D.C. 20460		13. TYPE OF REPORT AND PERIOD COVERED 14. SPONSORING AGENCY CODE EPA 400/03

15. SUPPLEMENTARY NOTES

16. ABSTRACT

Volume 1 of the EPA Environmental Data Base and Model Directory consists of the following indexes:

Names of Data Bases
Names of Models
Index of Organizations
Names of Discontinued Data Bases
Names of Discontinued Models

The brief description of data bases and models that appear within each of the indexes points to the specific page in Parts 1 and 2 of Volume 2 that contain a complete descriptive record of that data base or model.

17. KEY WORDS AND DOCUMENT ANALYSIS

a. DESCRIPTORS	b. IDENTIFIERS/OPEN ENDED TERMS	c. COSATI Field/Group

18. DISTRIBUTION STATEMENT	19. SECURITY CLASS *(This Report)*	21. NO. OF PAGES
		62
	20. SECURITY CLASS *(This page)*	22. PRICE

EPA Form 2220-1 (Rev. 4-77) PREVIOUS EDITION IS OBSOLETE

EPA ENVIRONMENTAL DATA BASE AND MODEL DIRECTORY

July 1983

The EPA Information Clearinghouse is providing this directory as an information service to the Environmental Protection Agency and, therefore, neither makes any statement concerning the quality or suitability of the models and data collection data bases, nor accepts any responsibility for the results of their use. Readers are directed to the specific contacts associated with each entry for further information and program acquisition.

INTRODUCTION

In late 1979, the concept of the Clearinghouse was originated by the Select Committee on Monitoring - a group of Program and Regional Division and ORD Laboratory Directors - and endorsed by the DAA Committee on Monitoring and Information Management prior to the Administrator's order. These individuals felt there was a need for a single and exhaustive record of EPA's environmental data both to certify non-duplication of effort of all the environmental data available throughout the Agency and to increase the Clearinghouse's response to EPA management and other federal agencies seeking information.

The Clearinghouse was formally established in 1980. Two publications resulted from the models and data collections survey. One was entitled "EPA Environmental Data Base and Model Index, May 1981". It contained office and chemical indices to the second publication "EPA Environmental Data Base and Model Index - Draft Directory, May 1981".

During the winter of 1982/83, the Clearinghouse conducted an Agency - wide survey to update the descriptions of each environmental measurement data base and environmental model operated or funded by EPA. The survey results described data bases and models. These descriptions have been automated and indexed by the Clearinghouse Office as a new component of the NIH/EPA Chemical Information System (CIS), and the automated file is searched to identify Agency data and refer users to data bases and models. Clearly, however, the information contained in the Inventory cannot describe in exhaustive detail all aspects of the data bases. Rather, the function of the Clearinghouse will be to provide initail searches and sorts within the level of detail encompassed on these forms and provide referrals to the contacts listed by the respondents to answer detailed questions or access the data in question. Data search and referral services performed by the Clearinghouse are available to all EPA personnel. The user may request that either the Clearinghouse conduct the search, or that the user may perform his own search on the system.

This Directory contains descriptions of each of the data bases and models as they appear in the computerized Inventory. The Directory is divided into two volumes: Volume 1, which contains an Introduction, a Names of Data Bases and Models section, an Organization section, and a Discontinued Data Bases and Models section; and, Volume 2, which includes the Complete Records section. The Names of Data Bases and of Models appear separately, each in alphabetical order, with an accession number that uniquely identifies that particular data base or model name, and a calendar date which denotes when the record was updated by the responsible organization. The Organization section is in order by the EPA organization which was requested to respond to the survey. The models and data bases are in alphabetical order under the organization, with accession number and status of the particular data base or model. The Discontinued Data Bases and Models section includes those records that were initially part of the Clearinghouse Inventory, but are no longer in use. They are listed in data base or model name order with its corresponding accession number. The Complete Records section, which comprises Volume 2, appears in accession number order with each data base and model description being replete with its full compliment of field identifiers and data.

As part of the CIS, access to the models and data bases is available on a commercial DEC 2060 computer. Since the Clearinghouse is now an on-going operation, Computer Output Microfiche (COM) and printed directories will be updated at least annually. However, the automated reference file can and should be kept more current. The Clearinghouse should be notified promptly of changes in data base content or contact personnel and, most importantly, of the addition of new data bases, models and error corrections so that the information and referrals it provides may be accurate as possible.

Comments and suggestions concerning the contents and arrangement of this Directory are welcome.
